Provenance

Every file in this delivery was made by Kaldune in room 80262c7d-9752-4a22-94dd-837a156a597c. Each file's origin record rides beside it as a `.provenance.json` twin, and images, films, audio and PDFs also carry the record inside the file where the format has a place for it (credential kind `kaldune-provenance-v1`). The original fingerprint is the file as the maker saved it; the delivered fingerprint is the file in this package.
