

FDOT Corridor Design Brief — RS&H-style demo

What's inside, and what to open first:

1. **I-4 at SR 434 Corridor Design Brief** ([1 · I-4 at SR 434 Corridor Design Brief.pdf](#)): Open this first. The five-page corridor design brief, built as if RS&H's transportation group delivered it to FDOT District Five — and closing on the page that names what the studio does for them.

Filed under Extras (reference and supporting material):

- **Engineering Content & Sources** ([Extras/Engineering Content & Sources.pdf](#)): The engineering substance behind the brief — corridor, numbers, and the FHWA basis for the crash-reduction figures. For the record; you'd never hand this to a reviewer.
- **Rendered Aerial — I-4 at SR 434 DDI** ([Extras/Rendered Aerial - I-4 at SR 434 DDI.jpg](#)): The commissioned aerial of the improved diverging-diamond interchange, the cover hero on its own.

Everything here also arrives as one zip: the Download kit.
