

Start here

Open this first: **First Light — your morning drive song**.

First Light is your morning drive song — a cinematic open-road instrumental built to hand you the horizon in the first breath and keep lifting from there. It opens lush and wide, settles into a steady driving groove, climbs, then lets go and fades out spacious. Fully instrumental, warm, made to develop across its full three minutes rather than loop. Open the track first and play it end to end; the cover sleeve rides beside it. If any stretch wants another pass, tell me where and it gets one.

What is in the kit
