

Start here

Open this first: **Oryx V12 — The Reveal**.

It's yours, Hicham — the Oryx V12, with the film recut the way you asked.

Open **Oryx V12 — The Reveal** first, sound up: the car revealed on the Tizi n'Tichka, built from fragments at dawn to the full car out of the hairpin, carried by an original orchestral score with no engine anywhere — I checked the sound end to end, it's pure music. Beside it, the **Specification Book**, the monograph with the car's story, the engine in section, every locked number, and the plates. And the concept frames you locked ride alongside as the full view set — exterior angles, the engine bay with the twelve gold stacks, the cockpit with the gate.

One car, no drift, start to finish. Sit with it — and if anything should tighten, name it and the room opens again.

What is in the kit

1 **Oryx V12 — The Reveal** *(open this first)*

Film • MP4 • oryx-v12-reveal.mp4

The hero film — the Oryx revealed on the Tizi n'Tichka, cut to an original orchestral score. Open this first, sound up.

2 **Oryx V12 — The Specification Book**

Document • PDF • oryx-v12-specification-book.pdf

The monograph: the car's story, the engine, the numbers, the interior and exterior plates, and the Atlas drive. Shelf-keepable — made to be kept.
